The Help Center and Agency Customization

The articles in the Help Center and videos in the Learning Library are based on the default setup of ChildPlus and assume full security access to all platforms, modules, features and fields. If you cannot find or access a feature referenced in an article, be aware that your agency's specific customization of ChildPlus determines:

- Your access to each platform
- Your access to specific modules or features
- Security or location restrictions for your level of access to ChildPlus
- Whether a module or feature has been turned on
- Which fields are available in each module
- The content of drop-down fields

Contact your ChildPlus administrator to verify your security access and the availability of a feature referenced in an article.

If you are a ChildPlus administrator and need to configure security access or turn on a feature, see [User Security Groups](#) or [contact us](#) for additional assistance.

Help Center Updates and ChildPlus Platforms

The Help Center is continually updated to reflect the current version of ChildPlus. Ensure that you are using the [latest version of ChildPlus](#) and referencing an article for the appropriate ChildPlus platform. Instructions for modules often differ between ChildPlus Online and ChildPlus Desktop and are unique for the Attendance App.

- To find out which version of ChildPlus you are using, see [About ChildPlus](#).
- For more information about the different platforms and how to access them, see [Platform Comparison](#).
- To learn about the differences between the modules in ChildPlus Desktop and ChildPlus Online, see [Module Comparison](#).

Table of Contents

Birth	5
Birth Record	6

Birth

The **Birth** module provides a way to document information about a participant's birth, including:

- Birth statistics
- Complications associated with the birth
- Issues the mother experienced during pregnancy

Birth Record

Use the **Birth Record** section to document information about a participant's birth, including:

- Weight, Length and other vital birth information
- Type of Delivery
- Birth Certificate #
- Birth Facility
- Delivery Complications
- Problems experienced by the baby at birth
- Health problems experienced by mother during her pregnancy or delivery

ChildPlus Online

To add a **Birth Record** in ChildPlus Online:

1. Go to **ChildPlus Online >> Services >> Birth >> Birth Record**.
2. Click or tap **Edit**.
3. Complete the [fields](#).

Field	Description
Weight (lb)	Weight (in pounds) at birth
Weight (oz)	Weight (in ounces) at birth
Length	Length (in inches) at birth
Head	Head circumference (in centimeters) at birth
 Type of Delivery	Delivery type (for example, C-Section or Natural)
APGAR (1 min)	APGAR score (1 minute after birth)
APGAR (5 min)	APGAR score (5 minutes after birth)
Gestational Age	Gestational age of baby
Unknown	Check if baby's Gestational Age is unknown
Birth Certificate #	Birth certificate number for baby Tip: If you have a copy of the birth certificate, you can upload it and save it as an Attachment
Birth Facility	Name of Birth Facility where baby was born

Field	Description
 Facility Type	Type of Birth Facility where baby was born (for example, hospital, home or birthing center)
City	City where Birth Facility is located
State	State where Birth Facility is located
Length of Stay	Number of days or weeks the baby spent at Birth Facility
 Medical Problems	Select each of the baby's Medical Problems
Describe any complications associated with this delivery (pre-term labor, fetal distress, etc.)	Document any delivery complications experienced by the baby's mother
Did this baby have any problems at birth? If yes, describe.	If the baby experienced problems during birth, select Yes and document problems
Did the mother have any health problems during this pregnancy/delivery? If yes, describe.	If the baby's mother experienced any health problems during her pregnancy or delivery, select Yes and document problems
Birth Record Notes	Document any additional details about the baby's birth

ChildPlus administrators can configure the settings for these fields in **ChildPlus Desktop >> Setup >> System Setup >> Customize Dropdown Choices**.

4. Click or tap **Save**.
